Dr. Sanjay GAUTAM

Man Behind the Show
(Innovator & Director)

Certified Iris Analyst & Counselor
Registration No.

ARIDGE/USA/IA/100001

ABOUT HIM

Dr. Sanjay Gautam – The inventor, Innovator & the founder of Iris analysis technology – A fully automated and powered by artificial intelligence.

ACADEMIC EXCELLENCE & TOPPER

A certified iris analyst counselor from American Research Institute of Dermis & Genetic Evaluation, USA, and topped the exam with **96%** marks.

FOUNDER & VISIONARY LEADER

Visionary founder of Iris Analysis Community, committed to take the concept of iris analysis across the globe.

PROFESSIONAL EXPERTISE

Extensive background in psychology & counselling with excellent communication skills & analytical abilities.

JOURNEY

Dr. Sanjay Gautam Journey's is marked by innovation, expertise, and a unwavering persuite of excellence. His impact of psychology, coueselling & artificial intelligence is poised to leave a lasting impression on the understanding and utilization of human potential.

What is Iris Analysis ?

Iris Analysis, also known as Iridology; is the scientific study of the patterns on the Iris, the colored part of your eyes. The iris is one of the most intricate and fascinating tissue structures in the human body. Iris Analysis or Iridology can provide accurate information about a person's physical health, mental abilities as well as inherent qualities of a person.

Father of Iris Analysis

Dr Ignatz von Peczely, a Hungarian Doctor (January 26, 1826 – July 14, 1911) is titled as the Father of Iris Analysis. While still a child he accidentally broke the leg of an owl. He noticed a black mark appearing in the owl's eye, which over time changed in form and shading. Ignatz von Peczely qualified in medicine at the Vienna Medical College in 1867. He had ample opportunity to study the iris of patients before and after surgery, systematically recording, correlating and publishing his research in the book 'Discoveries in the Realms of Nature and Art of Healing'. His 'Iris Chart' was established in 1880. In 1870, he published his papers describing his experiences, 'Quinine and Iodine change the Color of the Iris', and in 1893 published 'Om Oegen diagnosen', which included his 'Iris Chart' also.

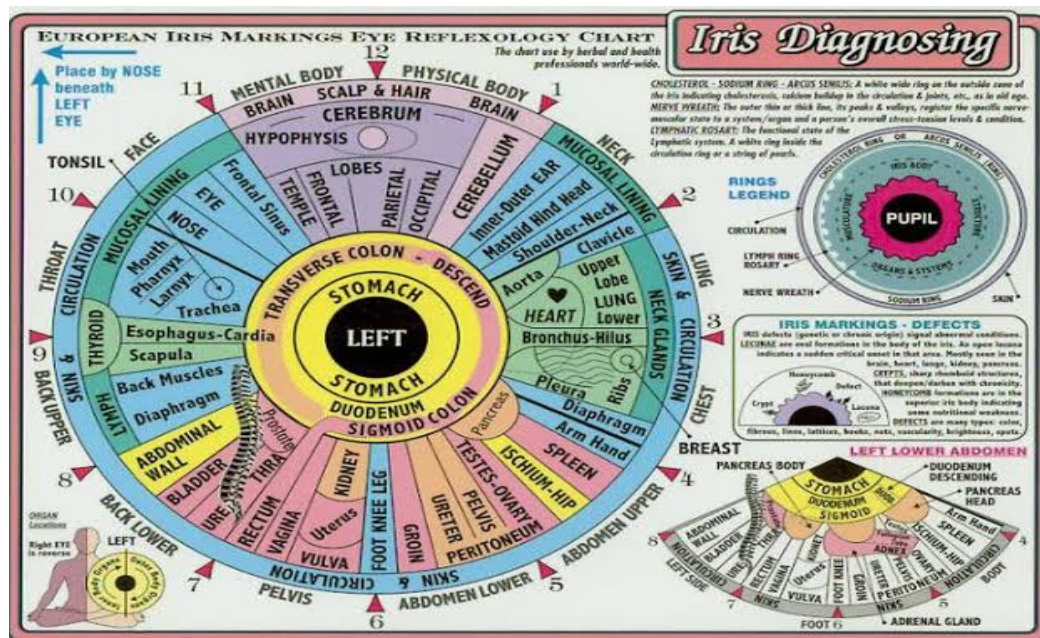

Dr Ignatz von Peczely
January 26, 1826 – July 14, 1911

Eyes and Brain Connection

- 1 Human eyes and brain are directly connected with each other.
- 2 Infact, brain is the only organ which is directly connected with our eyes.
- 3 The nerve that connects our eyes with brain is called Optic Nerve.
- 4 We have two eyes, each eye has one optic nerve. The optic nerve of our left eye is connected with our right brain and the optic nerve of our right eye is connected with our left brain.
- 5 Iris Analysis, also known as Iridology; is the scientific study of the patterns on the Iris, the colored part of your eyes.
- 6 Iris Analysis or Iridology can provide information about a person's mental abilities and inherent qualities.

Brain Lobes Stength

Quotients

Intelligence Quotient
Ability to analyze, reason & solve problems
Reflects comprehension & abstract thinking
Supports learning & academic achievements
Helps in structured decision-making
Directly proportional to your Intelligence

IQ 112

EQ 112

Emotional Quotient
Ability to analyze, reason & solve problems
Reflects comprehension & abstract thinking
Supports learning & academic achievements
Helps in structured decision-making
Directly proportional to your Intelligence

Creative Quotient
Ability to generate new & original ideas
Combines imagination & problem-solving
Seeking multiple solutions to a problem
Strongly linked to innovation & adaptability
Thinking "outside the box"

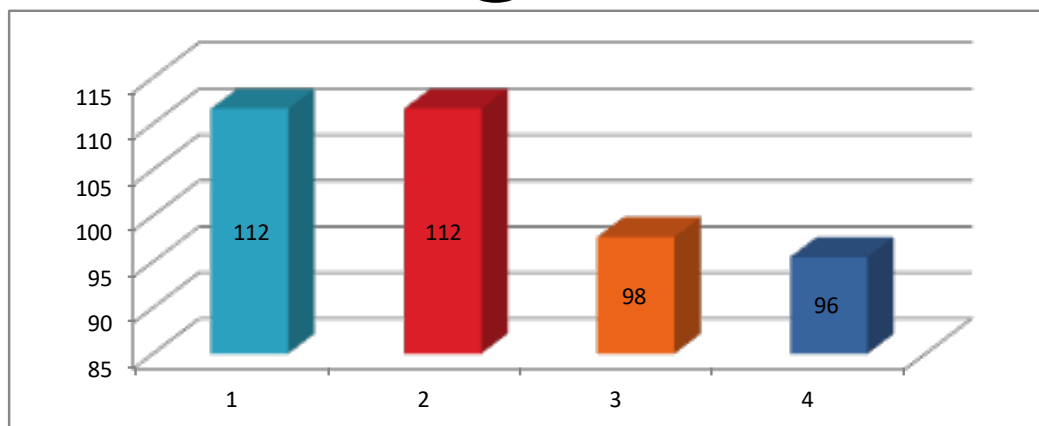

CQ 98

AQ 96

Adversity Quotient
Ability to deal with adverse situation
Handling and uncertainty
Determines persistence despite obstacles
Ability to deal with setbacks effectively
Ability to deliver under under pressure

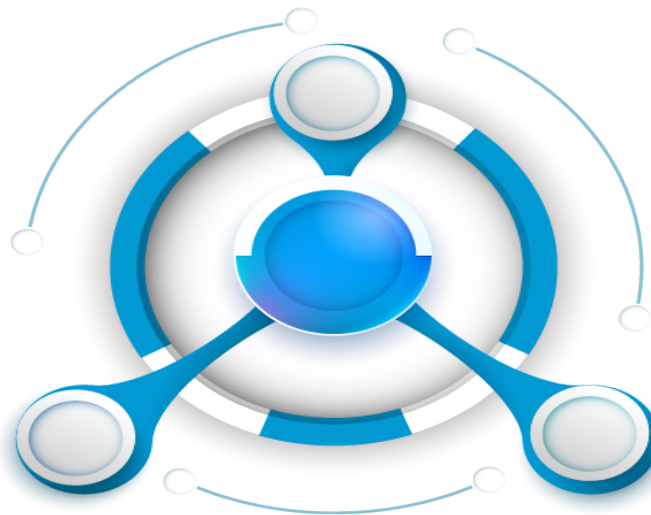

Learning Style

Visual Learner

71%

They learn by seeing things
They enjoy visual stimulation, color, vivid imagery
Relate most effectively to written information
They can remember faces but forget names
They like to study alone and quietly

Auditory Learner

89%

They learn by listening
They notice sound effects in movies
They enjoy music. They read slowly
They are good at explaining things
They follow spoken directions well
They like to read out loud
They can be distracted easily even by a little sound, voice or music

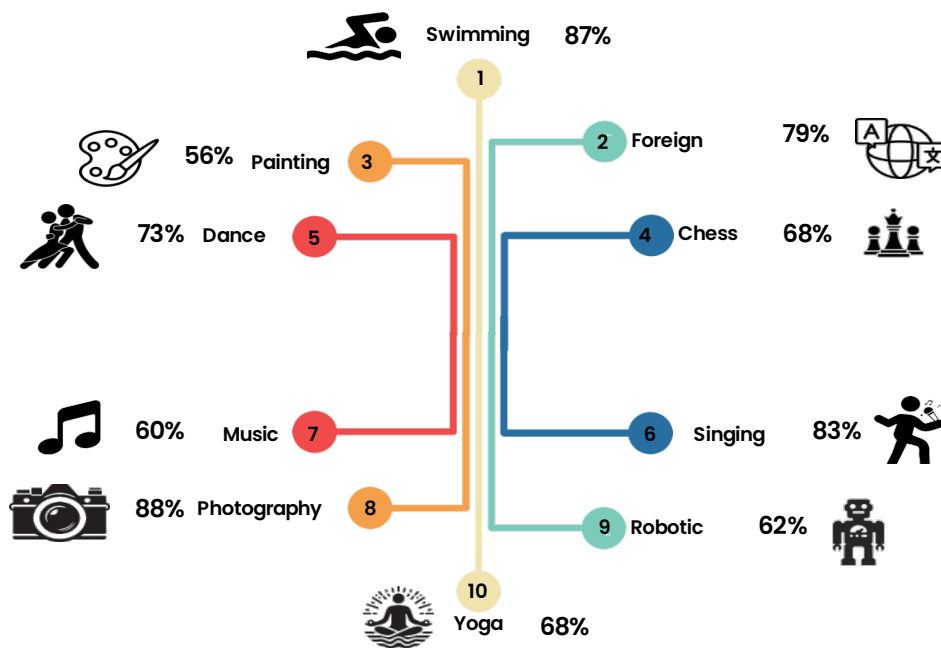

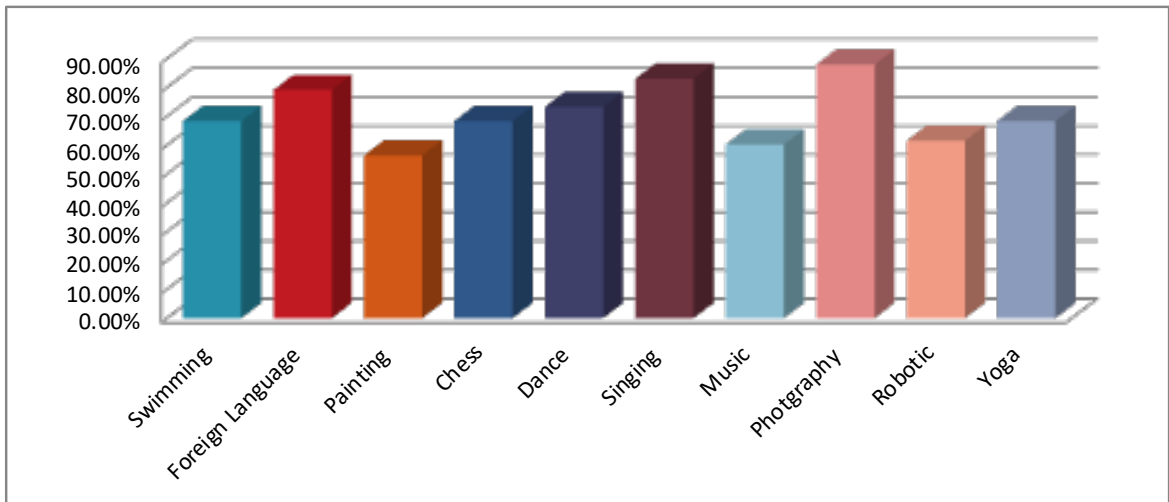

Kinesthetic Learner

67%

They learn by doing things
Relate most effectively to practical information
They tap a pencil/foot while studying
They like adventure books or movies
They like to watch movies or play video game
Respond while practically doing things rather than just listening or reading

Extra Curricular Activities

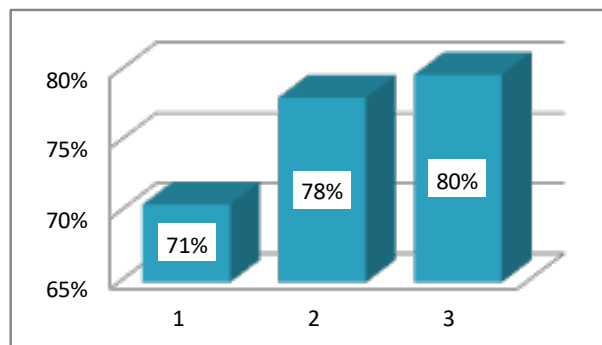

Stream

- 71%
- Focus : Reasoning, Analytical skills, & Problem Solving
 - Career Paths : Medicine, Engineering, Research, IT
 - Strengths Needed : Curiosity, scientific aptitude etc
